Name \_\_\_\_\_ Date \_\_\_\_\_

Required Item	Yes	TSE	No
Cover Sheet			
Table of Contents			
Introduction			
Materials List			
Procedures			
Results			
Discussion/Conclusion			
Bibliography (references)			

M	Meets the standard by completely developing each required element of the report. Scientific thinking is accurate and clearly communicated.
P	Is progressing toward the standard with most required sections of the report adequately developed. Scientific thinking may contain minor errors or explanations may be incomplete.
B	Is below the standard with several required sections of the report underdeveloped. Scientific thinking may contain concept errors.
E	Extends the standard by extensively developing each required element of the report with precision. Scientific thinking is accurate, insightful and may extend beyond the original scope of the project making accurate connections with other science concepts.

Students are encouraged to revise their projects in order to earn a mark of MEETS expectations for the overall report. Use this sheet to help you identify sections that need improvement.
